# School on the Cloud (SoC)

## connecting education to the Cloud for digital citizenship network

www.schoolonthecloud.eu

**Objectives**:
* To develop a network of 57 European partners from a range of different education sectors to promote Cloud initiatives in the public and private sectors
* To explore how education should respond to new ICT developments that are rapidly transforming the world of business, work and society
* To bring the educational opportunities offered by these powerful technologies to as broad an audience as possible

**Activities**:

* Research activities about tailor-made learning and the Cloud and publish the "state of art"

* Production of guidance resources for teachers and educators

* Establishing four work groups addressing the issues of management (transition), iTeacher (innovative teacher), tailor-made learning and Cloud-based digital features

*Follow the project* IN ACTION

**Results:**

* Education on the Cloud 2014: State of the Art

*This report documents the state of the art concerning the Cloud in education in partner countries across Europe. It describes policy perspectives, agencies and organisations promoting the Cloud in education, initiatives, projects and developments in different countries, it offers a list of relevant events and activities taking place in Europe, as well as key publications related to the project's scope*

* Presentations on the impact of Cloud-based platforms, application and tools
* Online catalogue of platforms, tools and apps for teachers, trainers and educators
* State of the art research of tailor-made learning and the Cloud
* Review of cloud-based futures and methodologies

**Partners**:
* Coordinator: Doukas School (Greece)
* Innovative Learning Network Ltd. (United Kingdom)
* EUROGEO European Association of Geographers (Belgium)
* GO! Education of the Flemish Community (Belgium)
* Ghent University (Belgium)

Date of project: 01/01/2014 – 31/12/2016
