

VOIP

VET for Over 50 Employees through multi-Feature Platform

www.voip-project.eu

Objectives:

The VOIP project aimed to provide SME 50+ employees with a training tool, which would allow them to become competent in the field of ICT and foreign languages, and therefore to feel underestimated, useless and discriminated no more

Specific objectives:

- * To transfer the innovative model of collaborative learning developed in Italy within the RAVT project and its adaptation to the needs of new target group: employees over 50 years of age working in SME sector
- * To implement the model as base for a Multi-feature platform in order to provide both target groups with opportunity of discussion
- * To study the ICT and languages training needs of both target groups (from perspective of employability of both groups)
- * To provide attractive VET training, change and promote attitudes regarding employees over 50 and to strengthen cooperation between SME, social partners and other stakeholders

Activities:

- * Multi-feature e-learning platform, three courses and learning materials in ICT based on the model of cooperative learning: three BLS language courses, three sections for target groups: two separate and one common
- * Questionnaires, reports, workshops and plans
- * Improved employability perspectives and changed attitudes
