

# Introducing the Citizens Xelerator project

## What can we learn from each other?

In Matosinhos, Portugal, the partners held peer-learning sessions on 8 and 9 February 2023. All partners met with the aim to share their experience, expertise, and resources related to CitizensXelerator in order to prepare the core project team for the work ahead.

During these sessions, partners shared expertise on topics like entrepreneurial skills, digital skills, and more. They also discussed European framework and guidelines.

Each partner presented their relevant projects as examples of good practice. These sessions aimed to enhance the team's skills and knowledge through collaborative learning.

Click on the video to find an overview of the peer-learning session.

## Working with adults on civic and democratic literacy

We aim to help adults improve their:

- personal, social and learning to learn competences
- financial, entrepreneurial, digital and sustainable literacy
- democratic and civic participation

To do so, we will create and implement:

- LifeComp Cards Collection
- Citizens Xelerator Model and Kit
- Citizens Xelerator Action Labs, Think Tank, Action, Days, and micro-learning sessions

## LifeComp Cards Collection

The LifeComp Cards Collection is a tool developed by the Citizens Xelerator project aiming to support organisations and professionals working with adult learners on:

- The identification of their personal, social and learning competences;
- The development of activities fostering the validation and recognition of adults' personal, social and learning competences, acquired in formal, informal and non-formal settings.

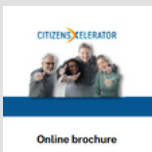

[View cards](#) >

The LifeComp Cards Collection was built based on the LifeComp Framework and is comprised of 9 cards, organised in 3 main areas:

- Personal – self-regulation, flexibility, well-being
- Social – empathy, communication, collaboration
- Learning – growth mindset, critical thinking, managing learning
