

Map of Experiences across Europe

Newsletter #2

Empowering language learning through Training, Digitalization and Innovation

The Eu+Map consortium is happy to share the last steps of the project, including the design of the Methodological Guidebook for Language Teachers.

Training in Bilbao

The Eu+Map Project has done important steps during the last six months. In May 2023 a Training for trainers was organized in Bilbao, to share the best practices in teaching the language to people with migratory backgrounds, and was designed the **Methodological guidebook** including theoretical background, national experts' & trainers' considerations for the national language programs, including best example implementations of the methodology focusing on positive experiential approaches.

Digitalization of the activity

During the Training the partners shared practical and theoretical activities on how emotional aspects affect learning processes and provided implementation examples of positive experiential learning programs. The activities proposed were digitalized in order to give them free access.

Digital Upskilling

In October, a Digital upskilling for trainers on how to create and install digital courses in the learning space Moodle was implemented. The 7 trainers from the partner's organization participated, they learned how to upload contents on the Moodle Platform, how to digitalize lessons and how to create digital language learning courses.
